### PROFESSIONAL SUMMARY

---

Senior full-stack engineer with 8+ years building web applications across the stack with ReactJS, TypeScript, and Node.js. At Skedulo, designs and builds web tools end to end — making key tech-stack decisions and owning CI/CD pipelines and cloud infrastructure on AWS (EKS, Lambda, S3, SQS, RDS). Experienced across the full delivery lifecycle — from technical design and hands-on development to monitoring and on-call incident response — for high-scale, government-facing and enterprise clients across the US, Australia, and Vietnam. Strong with PostgreSQL and MongoDB, containerized deployments (Docker, Kubernetes), and building automation frameworks that reduce QA regression effort.

### CORE SKILLS

---

**Languages:** TypeScript, JavaScript (Node.js), C#, Java, Python, Visual Basic

**Frontend:** ReactJS, Zustand, AngularJS

**Backend / Frameworks:** Node.js (Koa, NestJS), GraphQL, .NET / .NET Core, ASP.NET MVC, WCF

**Cloud & DevOps:** AWS (EKS, EC2, Lambda, S3, SQS, RDS, Route 53, ELB, Auto Scaling, Elastic Beanstalk, CodeBuild, CloudWatch), Docker, Kubernetes, DigitalOcean, Nginx, PM2

**CI/CD:** GitHub Actions, CircleCI, Jenkins, Semantic Release, AWS CodeBuild

**Databases:** PostgreSQL, MongoDB, MySQL, SQL Server

**Testing / Automation:** Playwright, SonarQube, SonarLint

**Monitoring:** Datadog, AWS CloudWatch, PM2

**Practices & Tools:** SOLID, design patterns, Git (GitLab, Bitbucket, GitHub), Jira, Trello, Microsoft Project, Visio

### PROFESSIONAL EXPERIENCE

---

#### Senior Software Engineer – Skedulo

May 2021 – Present

*Remote engineering for a global workforce-management SaaS company (HQ Brisbane, Australia)*

#### Form Builder (Jun 2023 – Present, team of 7)

- Built Form Builder, a ReactJS web tool that lets non-technical users design mobile forms, replacing the client's manual form-building workforce.
- Designed and implemented a data-driven form-rendering mechanism that generates JSON compliant with the Mobile rendering Engine (MEX).
- Drove key tech-stack decisions — adopting Zustand for state management and the TypeScript Compiler API for parsing TypeScript source code.
- Built a CI pipeline for automated npm package releases using GitHub Actions and Semantic Release.
- Partnered with mobile-engine engineers on integration and contributed to technical solution design and reviews.
- **Stack:** ReactJS, TypeScript, Koa, Kubernetes, AWS (EKS, S3, SQS, RDS), PostgreSQL, Datadog

#### Data Loading (Jan 2023 – Jun 2023, team of 7)

- Developed Data Loading, a high-performance tool that migrates data between Skedulo tenants and handles millions of records asynchronously without interrupting users.
- Proposed the system design and architecture and helped break down the work into deliverable tasks.
- Built an automation framework with Playwright to reduce QA regression effort.
- Implemented features from product feedback and coordinated integration work with other squads.
- **Stack:** ReactJS, Node.js, NestJS, Kubernetes, AWS (EKS, S3, SQS, RDS), PostgreSQL, CircleCI, Playwright, Datadog

#### Full-Stack Engineer — High-Capacity Vaccine Booking (May 2021 – Jan 2023, team of 13)

- Full-stack engineer on a high-capacity COVID-19 vaccination booking platform serving large volumes of patients via web and mobile, primarily for government clients.
- Designed and proposed solutions for customer requests and implemented features for government-based clients.
- Monitored production with Datadog and CloudWatch, troubleshoot client-reported issues, and served on-call during incidents.
- Collaborated with the Brisbane engineering team on technical resolution and reviewed teammates' work.
- **Stack:** ReactJS, Node.js, Koa, AWS (Lambda, EC2, RDS), PostgreSQL, CircleCI, CodeBuild, Datadog

#### **Senior Software Engineer** – Shynh Group

May 2020 – May 2021

*Leading Vietnamese spa chain — team of 3*

- Built admin platforms (Shynh Admin, Group Admin, Franchise Admin) to track bills, therapies, users, employees, inventory, and inter-branch product transfers for a growing spa chain.
- Set up AWS infrastructure end to end: created VPCs and Elastic Beanstalk environments, configured PM2 cluster mode, Route 53 domains, and security groups to restrict traffic to valid AWS resources.
- Integrated third-party CRM services to enhance customer-behavior management.
- Monitored AWS resources (CloudWatch, Elastic Beanstalk, PM2); contributed minor Android changes and published the mobile app to the Google Play Console.
- **Stack:** ReactJS, Node.js, AngularJS, .NET Core, ASP.NET MVC, MongoDB, AWS (EC2, S3, Lambda, Route 53, ELB, CloudWatch), Nginx, Jenkins, PM2

#### **Software Engineer** – KMS Technology

Apr 2018 – Apr 2020

*Ho Chi Minh City, Vietnam*

#### **Kelley Blue Book (KBB.com)** (Mar 2019 – Apr 2020, team of 4)

- Developed features for KBB.com, the trusted US vehicle-valuation platform and a Cox Automotive brand, as a .NET / ReactJS developer.
- Designed technical solutions and task breakdowns; fixed bugs and delivered enhancements from change requests.
- Monitored AWS resources (CloudWatch, Elastic Beanstalk).
- **Stack:** ReactJS, C#, Node.js, .NET Core, ASP.NET MVC, SQL Server, IIS, Nginx, AWS CodeBuild, Bitbucket / Git

#### **Santrax Agency Management** (Apr 2018 – Mar 2019, team of 16)

- Built and maintained a healthcare agency-management system as a .NET developer.
- Designed technical solutions and task breakdowns; fixed bugs and delivered enhancements from change requests.
- **Stack:** Visual Basic, .NET, Windows Communication Foundation (WCF), Crystal Report, SQL Server, IIS, Jenkins / TFS

#### **Java Developer** – TPS Software Solutions

Sep 2017 – Jan 2018

*Ho Chi Minh City, Vietnam — team of 7*

- Delivered 180+ screens for an electricity-management system built on a customized Java Swing framework.
- Planned per-screen implementation with the team and clarified requirements with the Business Communicator.
- Maintained code quality with SonarLint and SonarQube; documented deliverables before hand-off.
- **Stack:** Java, Swing, GitLab, Eclipse, CentOS
